Subject index

A

Abutment teeth, relative magnitudes of stress on, with different retainers (Shohet), 267
Accurate casts (Rudd, Morrow, and Bange), 545
  interocclusal records (Skurnik), 154
Acrylic resins, cold-curing, failure of (Mason), 456
  reaction of patient to: stomatitis venenata (Nealey and del Rio), 480
Alginate impressions, accuracy of, and water temperature (Harris) 613
Alloys, chrome-cobalt, casting, in small laboratories (Collett), 216
  gold, high-fusing, mechanical properties of (Leinfelder, Servais, and O'Brien), 523
American Board of Prosthodontics, candidates for, criteria for evaluating (Lytle), 417
Anterior unit-built porcelain prostheses, new design for (Weinberg), 61
Archial analysis in cephalometric roentgenography for maxillomandibular deformities (Ismail and Sotereanos), 184
Art, dental, in prosthodontics (Krajicek), 122
Articulators, Hanau H2, method of mounting Di-Lok crown and bridge trays on (Ruskin), 663
Attachment restorations, precision, planning (Lorencki), 506

B

Biomechanical principles of complete denture construction, cytologic study of effect of some, on keratinization of mucosa of edentulous ridge (Markov), 132
Bone surgery, evaluation of, in patients with immediate dentures (Wictorin), 6
Book reviews, 236, 347, 467, 677
Bridge and crown trays, Di-Lok, method of mounting, on Hanau H2 articulators (Ruskin), 663

C

Candidates for American Board of Prosthodontics, criteria for evaluating (Lytle), 417
Cast-aluminum dental prostheses (Gillette, Cohen, and Abrahamson), 92
Casting chrome-cobalt alloys in small laboratories (Collett), 216
  process, centrifugal, for resin-base dentures (Fairchild and Kelly), 607
Casts, accurate (Rudd, Morrow, and Bange), 545
Cavity liners, n-butyl and isobutyl cyanoacrylates as, marginal seal afforded by (Stark, Nicholson, and Soelberg), 380
Cementation, construction, and trouble-shooting of vertical nonparallel pin splint (Weinberg), 143
Cephalometric roentgenography, archial analysis in, for maxillomandibular deformities (Ismail and Sotereanos), 184
Cephalometry, photography, and oral impressions, techniques of, for infants (Mazaheri and Sahni), 315
Charge to Workshop on Advanced Prosthodontic Education (Hickey), 388
"Check-bite" method in fixed prosthodontics (Copoulos), 333

January, pp. 1-118; February, pp. 119-240; March, pp. 241-356; April, pp. 357-470; May, pp. 471-566; June, pp. 567-694.

"Check-bite"—Cont'd
technique in major oral reconstruction (Knap and Ziebert), 458
Chrome-cobalt alloys, casting, in small laboratories (Collett), 216
Cold-curing acrylic resins, failure of (Mason), 456
Combined splint-stress breaker removable partial denture (Bickley), 509
Communication, dentist-patient—major factor in treatment prognosis (Schabel), 3
Comparative study of four zinc oxide and eugenol formulations as restorative materials. Part I (Jendresen, Phillips, Swartz, and Norman), 176
Part II (Jendresen and Phillips), 300
Complete denture(s), construction, cytologic study of effect of some biomechanical principles of, on keratinization of mucosa of edentulous ridge (Markov), 132
mandibular, establishing stability for (Strain), 359
tooth-supported: approach to preventive prosthodontics (Morrow, Feldmann, Rudd, and Trovillion), 513
treatment in patients with resected mandibles (Brown), 443
Condylar path curvature, evaluation of validity of (Pipko), 626
Construction, cementation, and trouble-shooting of vertical nonparallel pin splint (Weinberg), 143
Contouring and festooning, wax, teaching aid for (Rodgers, Overberger, and Sipple), 667
Controlled functional waxing instrumentation for fixed occlusal reconstruction (Pipko), 338
Criteria for evaluating candidates for American Board of Prosthodontics (Lytle), 417
evaluation of advanced programs in prosthodontics (Krol), 423
Crown and bridge trays, Di-Lok, method of mounting, on Hanau H2 articulators (Ruskin), 663
Curvature, condylar path, evaluation of validity of (Pipko), 626
Cyanoacrylates, n-butyl and isobutyl, as cavity liners, marginal seal afforded by (Stark, Nicholson, and Soelberg), 380
Cytologic study of effect of some biochemical principles of complete denture construction on keratinization of mucosa of edentulous ridge (Markov), 132

D

Deformities, maxillomandibular, archial analysis in cephalometric roentgenography for (Ismail and Sotereanos), 184
Dental art in prosthodontics (Krajicek), 122
education, expanding horizons for (McCrea), 473
Dentist-patient communication—major factor in treatment prognosis (Shabel), 3
Denture(s), base polymers, fatigue failure in (Kelly), 257
combined splint-stress breaker removable partial (Bickley), 509
complete, construction, natural facial appearance as related to, guides for (Krajicek), 654
vertical and horizontal maxillomandibular relations in, intraoral technique for recording (Langer and Michman), 599
construction, complete, cytologic study of effect of some biomechanical principles of, on keratinization of mucosa of edentulous ridge (Markov), 132
educating patients to accept (Heartwell), 574
ill-fitting, oral lesions caused by (Bodine), 580
immediate, evaluation of bone surgery in patients with (Wictorin), 6
implant, histologic studies of human mandible supporting (Bodine and Mohammed), 203
intermediate (Hales and Sussman), 448
mandibular complete, establishing stability for (Strain), 359
partial, vertical jaw relations as factor in (Mehta and Joglekar), 618
resin-base, centrifugal casting process for (Fairchild and Kelly), 607

Denture(s)—Cont'd
treatment, complete, in patients with resected mandibles (Brown), 443
Design(s), new, for anterior unit-built porcelain prostheses (Weinberg), 61
of stock trays and retention of irreversible hydrocolloid impressions (Fusayama and Nakazato), 136
Development of new tool in restorative dentistry (Stern and Vernon), 536
Die, refractory, direct fabrication of restorations without foil on (Vickery, Badinelli, and Waltke), 227
Di-Lok crown and bridge trays, method of mounting, on Hanau H2 articulators (Ruskin), 663
Direct fabrication of restorations without foil on refractory die (Vickery, Badinelli, and Waltke), 227
Directory, 117, 239, 355, 469, 565, 679
Duplicate denture technique (Manoli and Griffin), 104

E

Ear prosthesis, fabrication of (Brown), 670
Edentulous mandibles, resected, prosthetic management of (Swoope), 197
mandibular reconstruction, resected, technique of splint contouring in (Brown), 532
patients, establishing individual occlusions for (Margarida), 485
ridge, mucosa of, keratinization of, cytologic study of effect of some biomechanical principles of complete denture construction on (Markov), 132
Education, advanced prosthodontic, workshop on, charge to (Hickey), 388
preliminary report (Boucher and Wood), 433
dental, expanding horizons for (McCrea), 473
in prosthodontics, advanced, four methods of, how 274 prosthodontists ranked (Morse and Boucher), 431
Endodontics, prosthodontic aspects of (Kayser), 645
Establishing individual occlusions for edentulous patients (Margarida), 485
stability for mandibular complete denture (Strain), 359
Esthetics, need for, in dentistry, study of (Goldstein), 589
Evaluating candidates for American Board of Prosthodontics, criteria for (Lytle), 417
Evaluation of advanced programs in prosthodontics, criteria for (Krol), 423
of bone surgery in patients with immediate dentures (Wictorin), 6
Expanding horizons for dental education (McCrea), 473

F

Fabrication, direct, of restorations without foil on refractory die (Vickery, Badinelli, and Waltke), 227
of hollow-bulb obturator (Brown), 97
Facial appearance, natural, as related to complete denture construction, guides for (Krajicek), 654
materials, prosthetic, methods for evaluating (Cantor, Webber, Stroud, and Ryge), 324
Failure of cold-curing acrylic resins (Mason), 456
Fatigue failure in denture base polymers (Kelly), 257
Festooning and contouring, wax, teaching aid for (Rodgers, Overberger, and Sipple), 667
Fixed occlusal reconstruction, controlled functional waxing instrumentation for (Pipko), 338
prosthodontics, "check-bite" method in (Copoulos), 333
Fluorescent photoanthropometry: method for analyzing mandibular motion (Rudd, Morrow, and Jendresen), 495
Functional interarch relationships recorded in wax (Skurnik), 283
waxing instrumentation, controlled, for fixed occlusal reconstruction (Pipko), 338

G

Gold alloys, high-fusing, mechanical properties of (Leinfelder, Servais, and O'Brien), 523

H

Hanau H2 articulators, method of mounting Di-Lok crown and bridge trays on (Ruskin), 663

High-fusing gold alloys, mechanical properties of (Leinfelder, Servais, and O'Brien), 523

Histologic studies of human mandible supporting implant denture (Bodine and Mohammed), 203

Hollow-bulb obturator, fabrication of (Brown), 97

Human mandible, histologic studies of, supporting implant denture (Bodine and Mohammed), 203

I

Immediate dentures, evaluation of bone surgery in patients with (Wictorin), 6

Implant denture, histologic studies of human mandible supporting (Bodine and Mohammed), 203

Impressions, alginate, accuracy of, and water temperature (Harris), 613

irreversible hydrocolloid, retention of, and designs of stock trays (Fusayama and Nakazato), 136

Infants, techniques of cephalometry, photography, and oral impressions for (Mazaheri and Sahni), 315

Injection of mercaptan, intraosseous (Van Hassel and Natkin), 529

Interarch relationships, functional, recorded in wax (Skurnik), 283

Intermediate dentures (Hales and Sussman), 448

Interocclusal records, accurate (Skurnik), 154

Intraosseous injection of mercaptan: case report (Van Hassel and Natkin), 529

Irreversible hydrocolloid impressions, retention of, and designs of stock trays (Fusayama and Nakazato), 136

Isobutyl and n-butyl cyanoacrylates as cavity liners, marginal seal afforded by (Stark, Nicholson, and Soelberg), 380

J

Jaw relations, vertical, as factor in partial dentures (Mehta and Joglekar), 618

Joint, temporomandibular, pain, analysis of patients with (Carraro, Quirch, and Albano), 639

K

Keratinization of mucosa of edentulous ridge, cytologic study of effect of some biomechanical principles of complete denture construction on (Markov) 132

L

Laboratories, small, casting chrome-cobalt alloys in (Collett), 216

Leakage, marginal, of dental restorations subjected to thermal stress (Guzman, Swartz, and Phillips), 166

Liners, cavity, n-butyl and isobutyl cyanoacrylates as, marginal seal afforded by (Stark, Nicholson, and Soelberg), 380

M

Management, prosthetic, of resected edentulous mandibles (Swoope), 197

Mandible(s), human, histologic studies of, supporting implant denture (Bodine and Mohammed), 203

resected edentulous, prosthetic management of (Swoope), 197

patients with, complete denture treatment in (Brown), 443

Mandibular complete denture, establishing stability for (Strain), 359

motion, method for analyzing: fluorescent photoanthropometry (Rudd, Morrow, and Jendresen), 495

reconstruction, resected edentulous, technique of splint contouring in (Brown), 532

Marginal leakage of dental restorations subjected to thermal stress (Guzman, Swartz, and Phillips), 166
seal afforded by n-butyl and isobutyl cyanoacrylates as cavity liners (Stark, Nicholson, and Soelberg), 380
Masticatory movements of patients after major oral surgery (Atkinson and Shepherd), 86
Maxillofacial prosthetics (Fonder), 310
Maxillomandibular deformities, archial analysis in cephalometric roentgenography for (Ismail and Sotereanos), 184
relations, vertical and horizontal, intraoral technique for recording, in complete dentures (Langer and Michman), 599
Mechanical properties of high-fusing gold alloys (Leinfelder, Servais, and O'Brien), 523
Mercaptan, intraosseous injection of (Van Hassel and Natkin), 529
Methods for evaluating prosthetic facial materials (Cantor, Webber, Stroud, and Ryge), 324
Mirror system for photographic slide presentations (Lowe), 650
Mucosa of edentulous ridge, keratinization of, cytologic study of effect of some biomechanical principles of complete denture construction on (Markov), 132
Multirooted teeth, roots of, separation and splinting of (Rosen and Gitnick), 34

N

N-butyl and isobutyl cyanoacrylates as cavity liners, marginal seal afforded by (Stark, Nicholson, and Soelberg), 380
New design for anterior unit-built porcelain prostheses (Weinberg), 61
parallelometer (de Rezende), 79
Newborn, prosthesis for (Malson), 384
News and notes, 110, 238, 348, 468, 560, 678

O

Obturator, hollow-bulb, fabrication of (Brown), 97
Occlusal reconstruction, fixed, controlled functional waxing instrumentation for (Pipko), 338
Occlusion(s), individual, establishing, for edentulous patients (Margarida), 485
medium of dentistry (Ricketts), 39
and periodontium, role of, in restorative procedures (Patur), 371
Oral impressions, cephalometry, and photography, techniques of, for infants (Mazaheri and Sahni), 315
lesions caused by ill-fitting dentures (Bodine), 580
reconstruction, major, "checkbite" technique in (Knap and Ziebert), 458
surgery, major, masticatory movements of patients after (Atkinson and Shepherd), 86

P

Pain, temporomandibular joint, analysis of patients with (Carraro, Quirch, and Albano), 639
Parallelometer, new (de Rezende), 79
Partial denture, removable, combined splint-stress breaker (Bickley), 509
Patients, educating to accept dentures (Heartwell), 574
with temporomandibular joint pain, analysis of (Carraro, Quirch, and Albano), 639
Periodontium and occlusion, role of, in restorative procedures (Patur), 371
Photoanthropometry, fluorescent: method for analyzing mandibular motion (Rudd, Morrow, and Jendresen), 495
Photographic slide presentations, mirror system for (Lowe), 650
Photography, cephalometry, and oral impressions, techniques of, for infants (Mazaheri and Sahni), 315
Pin splint, vertical nonparallel, construction, cementation, and trouble-shooting (Weinberg), 143
preparations (Weinberg), 19
Planning precision attachment restorations (Lorencki), 506

Polymers, denture base, fatigue failure in (Kelly), 257
Porcelain prostheses, anterior unit-built, new design for (Weinberg), 61
Practice of prosthodontics: Past, present, and future (Atwood), 393
Predictive prosthodontics. I. General health status and edentulousness (Setyaadmadja, Cheraskin, Ringsdorf, and Barrett), 475
Pre-extraction records, accurate, method for obtaining (Turner), 364
Preventive prosthodontics, approach to: tooth-supported complete dentures (Morrow, Feldmann, Rudd, and Trovillion), 513
Profile tracer: method for obtaining accurate pre-extraction records (Turner), 364
Programs in prosthodontics, advanced, criteria for evaluation of (Krol), 423
Properties, mechanical, of high-fusing gold alloys (Leinfelder, Servais, and O'Brien), 523
some relevant, of soft lining materials, and their determination (Wilson and Tomlin), 244
Prosthesis(es), anterior unit-built porcelain, new design for (Weinberg), 61
cast-aluminum dental (Gillette, Cohen, and Abrahamson), 92
ear, fabrication of (Brown), 670
for newborn (Malson), 384
Prosthetic(s) facial materials, methods for evaluating (Cantor, Webber, Stroud, and Ryge), 324
management of resected edentulous mandibles (Swoope), 197
maxillofacial (Fonder), 310
Prosthodontic(s), add youth to your smile by (Oral Health Committee of the FPO), 570
advanced education in, four methods of, how 274 prosthodontists ranked (Morse and Boucher), 431
programs in, criteria for evaluation of (Krol), 423
aspects of endodontics (Kayser), 645
Education, Advanced, Workshop on: Preliminary report (Boucher and Wood), 433
charge to (Hickey), 388
fixed, "check-bite" method in (Copoulos), 333
Prosthodontic(s)—Cont'd
practice of: past, present, and future (Atwood), 393
predictive, general health status and edentulousness (Setyaadmadja, Cheraskin, Ringsdorf, and Barrett), 475
preventive, approach to: tooth-supported complete dentures (Morrow, Feldmann, Rudd, and Trovillion), 513
for teen-age patients (Schabel and Regli), 251
Prosthodontists, 274, how they ranked four methods of advanced education in prosthodontics (Morse and Boucher), 431
Provisional splint with attachment, technique for (Williams), 555

R

Readers' round table, 108, 235, 346, 466
Reconstruction, major oral, "checkbite" technique in (Knap and Ziebert), 458
Record(s), accurate interocclusal (Skurnik), 154
pre-extraction, method for obtaining (Turner), 364
bases, stabilizing, with controlled subatmospheric pressure (Buffington), 14
Refractory die, direct fabrication of restorations without foil on (Vickery, Badinelli, and Waltke), 227
Relative magnitudes of stress on abutment teeth with different retainers (Shohet), 267
Removable partial denture, combined splint-stress breaker (Bickley), 509
Resected edentulous mandibles, prosthetic management of (Swoope), 197
mandibular reconstruction, technique of splint contouring in (Brown), 532
mandibles, patients with, complete denture treatment in (Brown), 443
Resin, cold-curing acrylic, failure of (Mason), 456
Resin-base dentures, centrifugal casting process for (Fairchild and Kelly), 607

Restorations, dental, marginal leakage of, subjected to thermal stress (Guzman, Swartz, and Phillips), 166
direct fabrication of, without foil on refractory die (Vickery, Badinelli, and Waltke), 227
precision attachment, planning (Lorencki), 506
Restorative dentistry, development of new tool in (Stern and Vernon), 536
materials, comparative study of four zinc oxide and eugenol formulations as, Part I (Jendresen, Phillips, Swartz, and Norman), 176
Part II (Jendresen and Phillips), 300
procedures, role of occlusion and periodontium in (Patur), 371
Retainers, different, relative magnitudes of stress on abutment teeth with (Shohet), 267
Retention of irreversible hydrocolloid impressions and designs of stock trays (Fusayama and Nakazato), 136
Roentgenography, cephalometric, archial analysis in, for maxillomandibular deformities (Ismail and Sotereanos), 184
Role of occlusion and periodontium in restorative procedures (Patur), 371
Roots of multirooted teeth, separation and splinting of (Rosen and Gitnick), 34

S

Seal, marginal, afforded by n-butyl and isobutyl cyanoacrylates as cavity liners (Stark, Nicholson, and Soelberg), 380
Separation and splinting of roots of multirooted teeth (Rosen and Gitnick), 34
Smile, add youth to your, by prosthodontics (Oral Health Committee of the FPO), 570
Soft lining materials: Some relevant properties and their determination (Wilson and Tomlin), 244
Splint contouring, technique of, in resected edentulous mandibular reconstruction (Brown), 532
provisional, with attachment, technique for (Williams), 555
Splinting and separation of roots of multirooted teeth (Rosen and Gitnick), 34
Splint-stress breaker removable partial denture, combined (Bickley), 509
Stability, establishing, for mandibular complete denture (Strain), 359
Stabilizing record bases with controlled subatmospheric pressure (Buffington), 14
Stock trays, designs of, and retention of irreversible hydrocolloid impressions (Fusayama and Nakazato), 136
Stomatitis venenata: reaction of patient to acrylic resin (Nealey and del Rio), 480
Stress, relative magnitudes of, on abutment teeth with different retainers (Shohet), 267
Study, comparative, of four zinc oxide and eugenol formulations as restorative materials (Jendresen, Phillips, Swartz, and Norman), 176
Subatmospheric pressure, controlled, stabilizing record bases with (Buffington), 14
Surgery, bone, evaluation of, in patients with immediate dentures (Wictorin), 6
major oral, masticatory movements of patients after (Atkinson and Shepherd), 86

T

Teaching aid for wax contouring and festooning (Rodgers, Overberger, and Sipple), 667
Technique(s) of cephalometry, photography, and oral impressions for infants (Mazaheri and Sahni), 315
duplicate denture (Manoli and Griffin), 104
for provisional splint with attachment (Williams), 555
of splint contouring in resected edentulous mandibular reconstruction (Brown), 532

Teen-age patients, prosthodontics for (Schabel and Regli), 251
Temperature, water, and accuracy of alginate impressions (Harris), 613
Temporomandibular joint pain, analysis of patients with (Carraro, Quirch, and Albano), 639
Thermal stress, marginal leakage of dental restorations subjected to (Guzman, Swartz, and Phillips), 166
Through eyes of editor (Boucher), 1, 119, 241, 357, 471, 567
Tool, new, in restorative dentistry, develop- of (Stern and Vernon), 536
Tooth-supported complete dentures: approach to preventive prosthodontics (Morrow, Feldmann, Rudd, and Trovillion), 513
Tracer, profile: method for obtaining accurate pre-extraction records (Turner), 364
Treatment prognosis, dentist-patient communication, major factor in (Schabel), 3
Troubleshooting, construction, and cementation of vertical nonparallel pin splint (Weinberg), 143

U

Unit-built porcelain prostheses, anterior, new design for (Weinberg), 61

V

Vertical nonparallel pin splint. Part I. Preparations (Weinberg), 19
Vertical nonparallel pin splint. Part II. Construction, cementation, and troubleshooting (Weinberg), 143

W

Water temperature and accuracy of alginate impressions (Harris), 613
Wax contouring and festooning, teaching aid for (Rodgers, Overberger, and Sipple), 667
functional interarch relationships recorded in (Skurnik), 283
Waxing instrumentation, controlled functional, for fixed occlusal reconstruction (Pipko), 338
Workshop on Advanced Prosthodontic Education, charge to (Hickey), 388
preliminary report (Boucher and Wood), 433

Y

Youth, add it to your smile by prosthodontics (Oral Health Committee of the FPO), 570

Z

Zinc oxide and eugenol formulations, four, comparative study of, as restorative materials, Part I (Jendresen, Phillips, Swartz, and Norman), 176
Part II (Jendresen and Phillips), 300

Subject index

A

Abutment teeth, simplified procedure for bilateral splinting of (Regan), 544
Accuracy of fit of direct-firing porcelain inlays (Christensen, Brown, and Babb), 46
Acrylic resin, hypersensitivity to (Stungis and Fink), 425
root implants (Lam and Poon), 657
tooth implants in rhesus monkeys, preliminary report (Brown, Neff, and Tylenda), 367
Aerosol contamination, laboratory, reduction of (Vig), 156
Alginate impressions, accurate (Rudd, Morrow, and Strunk), 294
boxing (Wiland), 99
American Academy of Restorative Dentistry, report of Committee on Scientific Investigation of (Branstad), 88
Board of Prosthodontics (Lytle), 687
Articulator controls, jaw movements engraved in solid plastic for, recording device (Lee), 209
transfer apparatus (Lee), 513
technique for mounting removable partial dentures on (Reitz), 490
Axial walls, parallelism, concept of (El-Ebrashi, Craig, and Peyton), 346

B

Base metal alloys, tissue response to (Mondelli and Alle), 230
Bilateral splinting of abutment teeth, simplified procedure for (Regan), 544
Block form stability in removable partial dentures (Zoeller), 633
Blushing of dentin, iatrogenic, following full crown preparation (Mullaney and Laswell), 354
Book reviews, 277, 386, 507
Boxing alginate impressions (Wiland), 99
Britain, practice of prosthetic dentistry in, today, review (Schwarz), 178

C

Caries, deep subgingival, clinical investigation of dual alloy restorations in teeth with (Liatukas), 242
Cast(s) and dies, superior, silver plating rubber base material for (Markley and Krug), 103
clasp transitional removable partial dentures (Smith and Rymarz), 381
restorations with gold-foil-like margins (Krug and Markley), 54
Clasping, teeth which have unfavorable shapes for, artificial undercuts for (Krikos), 301
Coloring, denture base, for patients with deep gingival pigmentation (Stuart), 631
Committee on Scientific Investigation of the American Academy of Restorative Dentistry, report of (Branstad), 88
Communication distortion, language of patients and practitioners of dentistry (Plainfield), 11
Compaction and microstructure of spherical alloy dental amalgam related to transverse strength (Pires, Hodson, Scott, and Stibbs), 234

July, pp. 1-138; August, pp. 139-280; September, pp. 281-396; October, pp. 397-510; November, pp. 511-618; December, pp. 619-722.

Complete denture(s), double processing technique for (Villa A.), 500
maxillary, palatal vessels related to (Maher and Swindle), 143
patients, Cornell Medical Index as prognostic aid for (Bolender, Swoope, and Smith), 20
principles of setups of (Friedman), 111
procedures taught in American and Canadian dental schools, results of survey (Levin and Sauer), 171
removable partial denture, and fixed partial denture, minimum clinical procedures for satisfactory services (Klein, Blatterfein, and Kaufman), 4
tooth-supported, description and clinical evaluation of simplified technique (Morrow, Powell, Jameson, Jewson, and Rudd), 414
Compound restorations, proximal reduction in, concept of (El-Ebrashi, Craig, and Peyton), 663
Constrictions, maxillomandibular, treatment of (Fonseca), 652
Contamination, aerosol, laboratory, reduction of (Vig), 156
Control, passive, in mandibular rest position (Yemm and Berry), 30
Cornell Medical Index as a prognostic aid for complete denture patients (Bolender, Swoope, and Smith), 20
Coverage, temporary, of anterior teeth (Cooper), 68
Crown retainers, telescope, for removable partial dentures (Isaacson), 436
Cuspid guidance, natural occurrence of (Scaife and Holt), 225

D

Dental amalgam, spherical alloy, compaction and microstructure of, related to transverse strength (Pires, Hodson, Scott, and Stibbs), 234
implant, transosteal mandibular (Christensen), 578
pulp, recent knowledge of, and its application to clinical practice (Retzlaff and Castaldi), 449
Dental—Cont'd
restorations, stress analysis of, experimental: geometry of proximal margins (El-Ebrashi, Craig, and Peyton), 333
occlusal reduction and pins (El-Ebrashi, Craig, and Peyton), 565
parallelism of axial walls (El-Ebrashi, Craig, and Peyton), 346
proximal reduction in compound restorations (El-Ebrashi, Craig, and Peyton), 663
specialists, dentists licensed as, in prosthodontics, 701
Dentin, iatrogenic blushing of, following full crown preparation (Mullaney and Laswell), 354
Dentists licensed as dental specialists in prosthodontics, 701
Denture(s) base coloring for patients with deep gingival pigmentation (Stuart), 631
complete, double processing technique for (Villa A.), 500
maxillary, palatal vessels related to (Maher and Swindle), 143
patients, Cornell Medical Index as prognostic aid for (Bolender, Swoope, and Smith), 20
principles of setups of (Friedman), 111
procedures taught in American and Canadian dental schools, results of survey (Levin and Sauer), 171
removable partial denture, and fixed partial denture, minimum clinical procedures for satisfactory services (Klein, Blatterfein, and Kaufman), 4
tooth-supported, description and clinical evaluation of simplified technique (Morrow, Powell, Jameson, Jewson, and Rudd), 414
implant, mastication strength with, as compared with soft-tissue–borne dentures (de Hernández), 479
partial, fixed, complete denture, and removable partial denture, minimum clinical procedures for satisfactory services (Klein, Blatterfein, and Kaufman), 4

Denture(s)—Cont'd
removable partial, block form stability in (Zoeller), 633
cast clasp transitional (Smith and Rymarz), 381
complete denture, and fixed partial denture, minimum clinical procedures for satisfactory services (Klein, Blatterfein, and Kaufman), 4
designed for laboratory fabrication by recent dental school graduates, survey of (Atkinson and Elliott), 429
evaluating by mathematical equations (Augsburger), 528
technique for mounting on articulator (Reitz), 490
telescope crown retainers for (Isaacson), 436
use of semiprecision rest in (Blatterfein), 307
soft-tissue–borne, mastication strength with, as compared with implant dentures (de Hernández), 479
stomatitis, etiology, exfoliative cytology, and treatment (Ritchie, Fletcher, Main, and Prophet), 185
technique, variations in, patient response to, design of study (Hickey, Henderson, and Straus), 158
Device to aid in arrangement of nonanatomic tooth forms (Miller and Feldmann), 37
Dies and casts, superior, silver plating rubber base material for (Markley and Krug), 103
Direct–firing porcelain inlays, accuracy of fit of (Christensen, Brown, and Babb), 46
Directory, 137, 279, 395, 509, 617, 707
Dual alloy restorations in teeth with deep subgingival caries, clinical investigation of (Liatukas), 242
Dysfunction, temporomandibular joint, predisposing causes for (Newton), 647

E

Electrosurgery, interceptive periodontics with (Malone, Eisenmann, and Kusek), 555
Extraoral pin technique (Nealon and Sheakley), 638
Eye prosthesis, pupil alignment in, instrument to achieve (Roberts), 487

F

Former and Plane Guide, Occlusal (Wiland), 671
Full crown preparation, iatrogenic blushing of dentin following (Mullaney and Laswell), 354

G

Geometry of proximal margins, concept of (El-Ebrashi, Craig, and Peyton), 333
Gingival pigmentation, deep, denture base coloring for patients with (Stuart), 631
Gold, high-fusing, in porcelain, soldering technique for (Schiffer), 495
porcelain fused to, solder connections with (Pruden), 679
Graduates, recent, of dental school, survey of removable partial dentures designed for laboratory fabrication by (Atkinson and Elliott), 429
Gypsum products, preweighing of, in UCLA School of Dentistry laboratories (Vig), 588

H

Hollow obturator, processing (El Mahdy), 682
Hypersensitivity to acrylic resin (Stungis and Fink), 425

I

Implant(s), dental polymer, concept (Hodosh, Povar, and Shklar), 371
transosteal mandibular (Christensen), 578
dentures, mastication strength with, as compared with soft-tissue–borne dentures (de Hernández), 479
mandibular, construction of, during surgery (Lang, Dootz, and Craig), 360
new method of attachment (Lang and Chiappa), 261
root, acrylic resin (Lam and Poon), 657

Implant(s)—Cont'd
tooth, acrylic resin, in rhesus monkeys, preliminary report (Brown, Neff, and Tylenda), 367
Impression(s), alginate, accurate (Rudd, Morrow, and Strunk), 294
boxing (Wiland), 99
procedures, maxillary edentulous, analysis of pressures produced during (Frank), 400
Inlays, direct-firing porcelain, accuracy of fit of (Christensen, Brown, and Babb), 46
Interceptive periodontics with electrosurgery (Malone, Eisenmann, and Kusek), 555

J

Jaw movements engraved in solid plastic for articulator controls, recording apparatus (Lee), 209
transfer apparatus (Lee), 513
Joint dysfunction, temporomandibular, predisposing causes for (Newton), 647

L

Laboratory aerosol contamination, reduction of (Vig), 156
Language of patients and practitioners of dentistry, communication distortion (Plainfield), 11

M

Mandibular dental implant, transosteal (Christensen), 578
implants, construction of, during surgery (Lang, Dootz, and Craig), 360
new method of attachment (Lang and Chiappa), 261
rest position, passive control in (Yemm and Berry), 30
surgical defects, maxillary speech prostheses for (Cantor, Curtis, Shipp, Beumer, and Vogel), 253
Margins, cast restorations with gold-foil-like (Krug and Markley), 54
proximal, concept of geometry of (El-Ebrashi, Craig, and Peyton), 333
Mastication strength with implant dentures as compared with soft-tissue–borne dentures (de Hernández), 479
Maxillary complete dentures, palatal vessels related to (Maher and Swindle), 143
edentulous impression procedures, analysis of pressures produced during (Frank), 400
speech prostheses for mandibular surgical defects (Cantor, Curtis, Shipp, Beumer, and Vogel), 253
Maxillofacial prostheses, reproducible fabrication (Firtell and Bartlett), 247
silicone elastomer, spray coloring of (Ouellette), 271
Maxillomandibular constrictions, treatment of (Fonseca), 652
Metal, base, alloys, tissue response to (Mondelli and Alle), 230
Microstructure and compaction of spherical alloy dental amalgam related to transverse strength (Pires, Hodson, Scott, and Stibbs), 234
Muscles of mastication, closing, forces generated by, and vertical dimension of occlusion, relationship between (Tueller), 284

N

News and notes, 133, 278, 387, 508, 609, 706
Nonanatomic tooth forms, device to aid in arrangement of (Miller and Feldmann), 37

O

Obturator, hollow, processing (El Mahdy), 682
Occlusal Plane Guide and Former (Wiland), 671
reduction and pins, concept of (El-Ebrashi, Craig, and Peyton), 565
Occlusion, vertical dimension of, and forces generated by closing muscles of mastication, relationship between (Tueller), 284
reproducing method for determining (Timmer), 621

Orbital prosthesis, fabrication of (Brown), 592

P

Palatal vessels related to maxillary complete dentures (Maher and Swindle), 143
Parallelism of axial walls, concept of (El-Ebrashi, Craig, and Peyton), 346
Partial denture(s), fixed, complete denture, and removable partial denture, minimum clinical procedures for satisfactory services (Klein, Blatterfein, and Kaufman), 4
removable, block form stability in (Zoeller), 633
cast clasp transitional (Smith and Rymarz), 381
complete denture, and fixed partial denture, minimum clinical procedures for satisfactory services (Klein, Blatterfein, and Kaufman), 4
designed for laboratory fabrication by recent dental school graduates, survey of (Atkinson and Elliott), 429
evaluating by mathematical equations (Augsburger), 528
technique for mounting on articulator (Reitz), 490
telescope crown retainers for (Isaacson), 436
use of semiprecision rest in (Blatterfein), 307
Patient(s) and practitioners of dentistry, language of, communication distortion (Plainfield), 11
complete denture, Cornell Medical Index as a prognostic aid for (Bolender, Swoope, and Smith), 20
response to variations in denture technique, design of study (Hickey, Henderson, and Straus), 158
Periodontal therapy, justification for splinting in (Waerhaug), 201
Periodontics, interceptive, with electrosurgery (Malone, Eisenmann, and Kusek), 555
Pin(s) and occlusal reduction, concept of (El-Ebrashi, Craig, and Peyton), 565
Pin(s)—Cont'd
technique(s), extraoral (Nealon and Sheakley), 638
for supporting tooth-colored restorations (Lord and Gilmore), 458
Plane Guide and Former, Occlusal (Wiland), 671
Plastic, solid, jaw movements engraved in, for articulator controls, recording device (Lee), 209
transfer apparatus (Lee), 513
Polymer dental implant concept (Hodosh, Povar, and Shklar), 371
Porcelain fused to gold, solder connections with (Pruden), 679
high-fusing gold in, soldering technique for (Schiffer), 495
inlays, accuracy of fit of direct-firing (Christensen, Brown, and Babb), 46
Position, mandibular rest, passive control in (Yemm and Berry), 30
Practitioners and patients of dentistry, language of, communication distortion (Plainfield), 11
Pressures produced during maxillary edentulous impression procedures, analysis of (Frank), 400
Preweighing of gypsum products in UCLA School of Dentistry laboratories (Vig), 588
Prosthesis(es), maxillofacial, reproducible fabrication (Firtell and Bartlett), 247
silicone elastomer, spray coloring of (Ouellette), 271
orbital, fabrication of (Brown), 592
speech, maxillary, for mandibular surgical defects (Cantor, Curtis, Shipp, Beumer, and Vogel), 253
tracheostomy (Swerdlow, Ketcham, and de Kernion), 84
Prosthetic dentistry, practice of, in Britain today, review (Schwarz), 178
Prosthodontics, dentists licensed as dental specialists in, 701
Proximal reduction in compound restorations, concept of (El-Ebrashi, Craig, and Peyton), 663
Pulp, dental, recent knowledge of, and its application to clinical practice (Retzlaff and Castaldi), 449

Pupil alignment in eye prosthesis, instrument to achieve (Roberts), 487

R

Readers' round table, 131, 276, 506, 704
Reduction, occlusal, and pins, concept of (El-Ebrashi, Craig, and Peyton), 565
Relining technique, wing (Christensen), 268
Removable partial dentures, block form stability in (Zoeller), 633
cast clasp transitional (Smith and Rymarz), 381
designed for laboratory fabrication by recent dental school graduates, survey of (Atkinson and Elliott), 429
evaluating by mathematical equations (Augsburger), 528
technique for mounting on articulator (Reitz), 490
telescope crown retainers for (Isaacson), 436
use of semiprecision rest in (Blatterfein), 307
Report of the Committee on Scientific Investigation of the American Academy of Restorative Dentistry (Branstad), 88
Resin, acrylic, hypersensitivity to (Stungis and Fink), 425
root implants (Lam and Poon), 657
tooth implants in rhesus monkeys, preliminary report (Brown, Neff, and Tylenda), 367
Rest, semiprecision, use of, in removable partial dentures (Blatterfein), 307
Restorations, cast, with gold-foil-like margins (Krug and Markley), 54
compound, proximal reduction in, concept of (El-Ebrashi, Craig, and Peyton), 663
tooth-colored, pin techniques for supporting (Lord and Gilmore), 458
Restorative material, new, tissue reactions to (Sayegh and Reed), 468
service, fractionalized, coordination (Nuttall), 289
Root implants, acrylic resin (Lam and Poon), 657

S

Schools, dental, American and Canadian, complete denture procedures taught in, results of survey (Levin and Sauer), 171
Semiprecision rest, use of, in removable partial dentures (Blatterfein), 307
Setups, principles of, in complete dentures (Friedman), 111
Silicone elastomer maxillofacial prostheses, spray coloring of (Ouellette), 271
Silver plating rubber base material for superior dies and casts (Markley and Krug), 103
Soft-tissue–borne dentures, mastication strength with, as compared with implant dentures (de Hernández), 479
Solder connections with porcelain fused to gold (Pruden), 679
Soldering technique for high-fusing gold in porcelain (Schiffer), 495
Speech prostheses, maxillary, for mandibular surgical defects (Cantor, Curtis, Shipp, Beumer, and Vogel), 253
Splinting, bilateral, of abutment teeth, simplified procedure for (Regan), 544
in periodontal therapy, justification for (Waerhaug), 201
Spray coloring of silicone elastomer maxillofacial prostheses (Ouellette), 271
Stomatitis, denture, etiology, exfoliative cytology, and treatment (Ritchie, Fletcher, Main, and Prophet), 185
Strength, transverse, compaction and microstructure of spherical alloy dental amalgam related to (Pires, Hodson, Scott, and Stibbs), 234
Stress analysis of dental restorations, experimental: geometry of proximal margins (El-Ebrashi, Craig, and Peyton), 333
occlusal reduction and pins (El-Ebrashi, Craig, and Peyton), 565

Stress—Cont'd
parallelism of axial walls (El-Ebrashi, Craig, and Peyton), 346
proximal reduction in compound restorations (El-Ebrashi, Craig, and Peyton), 663
Survey of complete denture procedures taught in American and Canadian dental schools, results (Levin and Sauer), 171

T

Technique, denture, variations in, patient response to, design of study (Hickey, Henderson, and Straus), 158
extraoral pin (Nealon and Sheakley), 638
Teeth, abutment, simplified procedure for bilateral splinting of (Regan), 544
anterior, temporary coverage of (Cooper), 68
which have unfavorable shapes for clasping, artificial undercuts for (Krikos), 301
Telescope crown retainers for removable partial dentures (Isaacson), 436
Temporomandibular joint dysfunction, predisposing causes for (Newton), 647
Through eyes of editor (Boucher), 1, 139, 281, 397, 511, 619
Tissue reactions to new restorative material (Sayegh and Reed), 468
response to base metal alloys (Mondelli and Alle), 230
Tooth-colored restorations, pin techniques for supporting (Lord and Gilmore), 458
forms, nonanatomic, device to aid in arrangement of (Miller and Feldmann), 37
Tooth—Cont'd
supported complete dentures, description and clinical evaluation of simplified technique (Morrow, Powell, Jameson, Jewson, and Rudd), 414
Tracheostomy prostheses (Swerdlow, Ketcham, and de Kernion), 84
Transfer apparatus, jaw movements engraved in solid plastic for articulator controls (Lee), 513
Transosteal mandibular dental implant (Christensen), 578
Transverse strength, compaction and microstructure of spherical alloy dental amalgam related to (Pires, Hodson, Scott, and Stibbs), 234
Treatment of maxillomandibular constrictions (Fonseca), 652

U

UCLA School of Dentistry laboratories, preweighing of gypsum products in (Vig), 588
Undercuts, artificial, for teeth which have unfavorable shapes for clasping (Krikos), 301

V

Vertical dimension of occlusion, and forces generated by closing muscles of mastication, relationship between (Tueller), 284
reproducing method for determining (Timmer), 621
Vessels, palatal, related to maxillary complete dentures (Maher and Swindle), 143

W

Wing relining technique (Christensen), 268
